DESCRIPTION:

The 54 Watt Sunlite T5 High Output/High Performance Fluorescent Straight Tube puts out a bright 5,000 lumens of light at a 4100K cool white color temperature. It features a mini bi-pin base (G5) and an average life span of 20,000 hours. It achieves a higher color rendering index (CRI) of 82 due to the use of tri-phosphors (rare earth phosphors) that also help increase the lumens per watt (LPW) output to 92.59. Shatter shield technology means if the lamp is broken virtually all glass and chemicals are safely contained within the outer coating. Ideal for use in commercial lighting fixtures, signs and displays. High output, extended life, and increased efficiency all add up to a superior quality bulb.
