

# INSTALLATION INSTRUCTIONS

## LED WARP LIGHT

120-277V / AC

### READ AND FOLLOW SAFETY INFORMATION

Turn off the main power at the circuit breaker before installing and servicing the fixture to prevent possible injury from electric shock.

All electrical connections must be in accordance with local and National Electrical Code (N.E.C.) standards. If you are unfamiliar with proper electrical wiring connections, obtain the services of a qualified electrician.

### INSTALLATION & ASSEMBLY

1. Remove the fixture and the mounting package from the box and make sure that no parts are missing by referencing the illustrations on the installation instructions.
2. Remove existing fixture and disconnect all electrical wiring.
3. Mark two hole locations on the wall that align with hole distance in fixture body (10). Drill four holes with 5/16" size drill bit at the marked locations. Insert drywall anchors (9) into each drilled mounting hole.
3. Secure the fixture body (10) to the outlet box (1) with the outlet box screws (11). Secure the fixture body (10) to the drywall anchor (9) with the drywall anchor screws (12).
4. The fixture shade (14) is secured to the fixture body (10) by rotating the rotary clasps (13).

### Care Instructions:

**WARNING:** Always be certain that electric current is turned off before cleaning. Only a soft damp cloth should be used. Harsh cleaning products may damage the finish.
